# Thermal And Near infrared Sensor for carbon Observation (TANSO) onboard the Greenhouse gases Observing SATellite (GOSAT)

Research Announcement

#### Appendix D

Contents of Research Proposal and Application Forms

#### 1. Cover sheet

#### 1.1. Profile of investigators (Form 1a)

Fill in the following information in its entirety.

- Information about the Principal Investigator (PI): Name, title, department, affiliation, address, nationality, phone number, fax number, e-mail address
- Information about the RA Investigators other than the PI (Co-Is): Name, affiliation, and e-mail address of each RA Investigator
- The PI's background, experience in the selected research field, research papers, etc.
- · Signature of the PI

#### 1.2. Summary of the research proposal (Form 1b)

Fill in the following information in accordance with the instructions given in parentheses.

- Research field (Select one from the five given fields: Calibration/ Validation/ Processing algorithms/ Carbon balance estimation, atmospheric transport models/ Data application.)
- Research theme (Describe the contents of your proposed research in the most simple and adequate way.)
- Main sensor to be used (Select from FTS/CAI/None.)
- Sensors to be used in combination (Select from FTS/CAI/None, just in case.)
- · New data acquisition request, if necessary. Detailed requirement will be specified later
- Data distribution request (If necessary, select the product name(s) from Table 1 "List of GOSAT/TANSO Products" in the RA Document.)
- Abstract of your research proposal (no more than 200 words) (Include the purposes, significance of the research in the selected research field, methods, time schedule, and expected benefits of the proposed research)

#### 2. Main proposal (no more than five (5) pages)

Describe in detail the background, purposes, and technological level of the proposed research, the importance of the research compared with related researches carried out in the other fields, and the details of research activities, in the main body of the proposal. In addition, the details of research activities must include a rough plan of the work and experiments to be performed and an outline of the methods and procedures to be employed in the research. Having covered these items, describe the following items where necessary.

- · Table of contents
- Purpose(s) of the proposed research
- · Significance and importance of the proposed research in the selected research field
- Methodology
- · Algorithms to be used
- Expected outcomes

- Distribution requests and acquisition plan for the GOSAT/TANSO data (area of interest, processing level, product name, acquisition window, etc.)
- Requests for the satellite data owned by JAXA (area of interest, processing level, acquisition window, etc.)

#### 3. Work plan (Research schedule) (Form 2)

Submit the time schedule for your research activities on Form 2, with an explanation on the focus of research work and any associated schedules.

#### 4. Data distribution request

Request for JAXA's satellite data (other than the GOSAT data) (Form 3)

In order to request a provision of datasets of any of the satellites listed below, fill out and submit Form 3. JAXA has the rights to distribute the observation data of the following satellites.

- · Advanced Land Observation Satellite (ALOS) (global)
- Advanced Land Observation Satellite-2 (ALOS-2) (global)

In addition, the satellite data acquired in the past are archived and retrievable on the following website. Investigators who are willing to request for the satellite data are recommended to first check on the website if the data requested are available, before submitting a data request form.

 Search site for observation data of JERS, ADEOS, TRMM, etc.: https://www.gportal.jaxa.jp/gp/top.html

#### 5. Information about the Investigators

State the background, research papers or publications, and special skills and qualifications of the PI, as supporting information for the selection of research proposals. Likewise, present the same information about the other RA Investigators (Co-Is).

#### 6. Data processing and analysis facility

List up major facilities and equipment available for carrying out the proposed research and additional facilities and equipment that the Investigators may procure. Also, describe the assistance from their organizations/affiliations, if any, for which the RA Investigators are qualified for the purpose of carrying out the proposed research.

Form 1a Proposal No.

(For JAXA/NIES/MOE's use)

Form 1b	Proposal No.
	(For JAXA/NIES/MOE's use)
	Name of PI:

# Summary of Research Proposal

(Pl	ace "x" in the parentheses by the pertinent response.)
1.	Research field (Choose one only.) *
	[ ] Calibration [ ] Validation [ ] Data processing algorithms
	[ ] Carbon balance estimation, atmospheric transport models [ ] Data application
	*Your choice of research field will not affect the selection of research proposals.
2.	Main sensor to be used
	[ ] FTS [ ] CAI [ ] None
3.	Sensors to be used in combination
	[ ] FTS [ ] CAI [ ] None
4.	New data acquisition request
	[ ] Yes [ ] No
	→If yes, detailed requirement will be specified below.
5.	Request for data distribution
	[ ] Yes [ ] No
	→If yes, select the product name(s) from "Table 1 List of GOSAT/TANSO Products" in the RA
	Document.
6.	Research theme
7.	Abstract of the research proposal (no more than 200 words)

Form 2

Proposal No.

Work Plan for the Joint Research (Research Schedule)

Name of PI:

	2017					2018 2019													
	2	4	6	8	10	12	2	4	6	8	10	12	2	4	6	8	10	12	
Plan													Int Eval	erim uation				F	Interim Evaluation
Description																			

	2020						2021						
	2	4	6	8	10	12	2	4	6	8	10	12	
Plan							Int Eval	erim uation					Interim Evaluation
Description													

Proposal No.

# Requests for JAXA's satellite data (other than the GOSAT data) (For ALOS or ALOS-2)

Sensor	Area of Interest  (pass/row or lat./lon.)	Observation window	No. of	scenes  Max.	Processing level
				<u> </u>	

The distribution media for providing the requested data will be determined according to the data size. JAXA's other EOS data are freely available to general users from G-Portal (Globe-Portal (BETA) on JAXA website: https://www.gportal.jaxa.jp/gp/top.html).
